56-61and 67-73 are pending in the present application at the time of examination.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

a) Species I, e.g. Sets of claims 1, 11-13, 19-20, 40, 64 and 3- 6, 9- 10, 37, 39:

Method for manufacturing SOI template layer without the step of depositing oxide layer on the crystalline structure and remove at least a portion of the oxide.

b) Species II, e.g. Sets of claims 56-61,: Method for manufacturing SOI template layer with the step of depositing oxide layer on the crystalline structure and remove at least a portion of the oxide.

c) Species III, e.g. Sets of claims 14, 36 and 66,: Method for manufacturing SOI template layer with the step of forming a metal layer over the layer, the metal layer is reactive with silicon atoms and heating the metal layer to cause the metal layer to react with silicon atoms in the layer (silicide process).

d) Species IV, e.g. Sets of claims 56-61,: Method for manufacturing SOI template layer with the step of depositing oxide layer on the crystalline structure and remove at least a portion of the oxide.

e) Species V, e.g. Sets of claims 44, 46-54 and 67-73: Method for manufacturing SOI template layer with:

the step of forming material on the crystalline structure, wherein the forming includes using a process that consumes atoms of the first type in a way that injects vacancies into the crystalline structure wherein vacancies recombine with atoms including atoms of the second type (see Independent claim 44).

the step of forming an oxynitride layer over the crystalline structure, wherein the forming includes using a process that consumes a portion of the first semiconductor layer (see Independent claim 67).

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, no claim is generic. Applicant is advised that a response to this requirement must include an identification of the species that is elected

consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is all claims are generic is considered non-responsive unless accompanied by an election.

3. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the selection, applicant must indicate which are readable upon the elected species. M.P.E.P. 809.02(a). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filled petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung A. Le whose telephone number is (571) 272-1784. The examiner can normally be reached on Monday-Friday 8:00am- 4:30pm.
